

Gabriel Sabella

North Providence, RI | (508) 409-7175 | gabe.sabella.dev@gmail.com | <https://gabesabella.dev>

Professional Summary

Full stack developer with 3+ years of experience building internal and client-facing applications using C#, .NET, Blazor, and SQL Server. Known for leading projects end-to-end, improving operational reliability, and delivering solutions beyond expectations. Passionate about designing and developing clean architecture and user interfaces.

Technical Skills

Languages: C#, SQL

Frameworks: .NET, Blazor, React

Databases: SQL Server, SQLite, MongoDB

Architecture & Tools: Azure Service Bus, Entity Framework, REST APIs, Azure DevOps, GitHub

Other: Active Directory, background job processing, authentication & authorization, Web Assembly

Professional Experience

NHPRI

Full Stack Developer | March 2025 – Present

- Leading end-to-end development of C# / Blazor applications improving operational visibility and compliance tracking
- Architecting event-driven monitoring systems using .NET, Blazor, and SQL Server
- Maintaining and enhancing internal and member-facing applications that support operations and provider workflows

Convention Data Services

Software Engineer | August 2023 – March 2025

- Developed and supported .NET-based live event integrations used by enterprise exhibitors
- Contributed to a C#/.NET authentication API enabling secure third-party REST integrations
- Partnered with project managers and senior engineers to deliver reliable production releases
- Wrote integration tests and provided production support for high-visibility applications

Selected Projects

- Beacon – Built a scalable Azure Service Bus dashboard for monitoring critical overnight processes with component apps for publishing, consuming, processing, and displaying messages
- Mailroom Printing App – Built a printing web application for mailroom operations with compliance logging, time/cost saving design, and role based features via Active Directory integration

Education

Bachelor of Science in Computer Science, May 2023 – Western Governor's University
